

A SMALL CHURCH WITH A BIG HEART

A small change can make a big difference

In 1963 Meteorologist Edward Lorenz presented the hypothesis that became known as the butterfly effect. He theorized that a minor event, like the flapping of a butterfly's wings in Brazil, could alter wind currents sufficiently to cause a tornado in Texas.

This simple discovery can radically alter your spiritual, emotional, relational or financial life.

One decision, one change, one risk, one idea – that is all it takes.

You don't have to make 100 changes – you just have to be 100% committed to one change.

Yes, it may take an all-out effort and may be the hardest thing you have ever done – but that one change has the potential to make a 100% difference in your life.

God provides us with all we need to take this step.

*His words of guidance are contained in the Bible.
His Son Jesus Christ is closer to us than anyone can ever be
– our best friend.*

*Our belief in Jesus as our Saviour means we are given the
gift of the Holy Spirit who strengthens and leads us.*

What is the change you wish to make today?
